MCITP: SharePoint Administrator 2010
MCPD: SharePoint Developer 2010

OBJECTIVE

To leverage my extensive knowledge of Microsoft SharePoint and the entire Microsoft technology stack to deliver collaboration solutions that enable productivity in the enterprise.

SUMMARY

Proven expertise in leading complex software projects and ensuring on-time delivery. Over 10 years of experience leveraging the Microsoft stack. Outstanding background of thought leadership and innovation within the collaboration space. Recognized as subject matter expert in numerous technical areas. Strong attention to detail.

EXPERIENCE

Group Manager, Collaboration, ITS | Avanade
March 2010 - Present

Avanade is a global systems integrator and subsidiary of Accenture and Microsoft. We deliver enterprise solutions exclusively based on Microsoft technology. As a group manager in the collaboration service line I lead development teams to deliver customer solutions leveraging the SharePoint platform. As a lead I'm responsible for working the project from estimation through delivery. I work directly with our customers to establish requirements and then translate those into detailed technical designs for our onshore and offshore development teams. The projects on which I've worked have enabled knowledge retention and collaboration across job function, practice, and geography of several large organizations.

Within Avanade I am the mountain region Office 365 specialist and have assisted with our sales efforts to bring new customers onto the Microsoft hosted SharePoint option.

My principal responsibilities on my current project include infrastructure design, solution design, code review, and delivery management of development staff.

Solution Architect | NewsGator Technologies

June 2008 - March 2010

NewsGator provides a suite of products that enhance Microsoft SharePoint with microblogging, social networking, RSS publication and consumption capabilities. My role as Solution Architect was to support the efforts of their clients to incorporate these technologies into larger portal projects.

- Assisted fortune 100 customers with architecture design and deployment of social networking solution on top of Microsoft SharePoint.
- Provided development support and guidance for clients creating custom solutions leveraging Microsoft SharePoint and NewsGator Social Sites.
- Provided architecture design and review of infrastructure to scale SharePoint and NewsGator Social Sites to support in excess of 200,000 users in a geographically fault tolerant configuration.
- Provided general best practice support of the Microsoft technology stack as it relates to SharePoint and NewsGator Social Sites.

Technical Integration Project Manager | SHL Group PLC

2006 – June 2008

SHL provides web based recruitment and assessment tools built on the Microsoft stack using ASP.NET. My role as Integration Project Manager was to integrate those solutions with SHL's strategic partners using industry standard methodologies. I provided detailed technical and development support of the various APIs published by SHL. I developed the detailed design requirements and managed internal SHL resources to deliver the final integration solution.

- Supported clients using HR-XML and SOAP based Web Services.
- Prepared detailed design documents for offshore team.
- Conducted code review and sign-off of deliverables from offshore team.
- Prepared technical documentation of integration for both internal staff and integration partner.
- Provided on-going tier 3 support of the integration to maintain client satisfaction.
- Acted as the main client interface for large scale technology projects.
- Created technical specification and design documents.
- Established project timelines for delivery.

Senior Software Consultant (Developer) | SHL Group Plc

2001 - 2006

Utilized Microsoft technologies to deliver web solutions which enabled customers to assess job applicants on a web based platform.

- Reviewed specification documents, test cases, and change requests to ensure deliverable meets technology expectations.

- Estimated development effort based on established guidelines.
- Developed custom solutions using Microsoft technologies (C#, VB.Net, VB6) to meet design requirements.
- Worked with graphics design team and developed look and feel of client specified custom systems using HTML and CSS.
- Designed relational databases including custom stored procedures using T-SQL.

Owner/Founder | BrioSolutions, LLC

2001 - 2005

BrioSolutions was my own company that I started in order to provide consulting services to local businesses. My work was focused around the use of the Linux/Apache/MySQL/PHP stack to deliver web solutions for a variety of small business clients across industries. My time as an independent consultant overlapped with my time as a developer at SHL.

- Provided PHP consulting and application development services.
- MySQL database design.
- Application upgrade and maintenance of existing solutions.
- Administration of Red Hat Linux/Apache/MySQL/PHP servers for hosting of client systems.

Assistant Network Administrator | Office of Financial Aid – University of Colorado

1996 – 2001

- Deployed and configured new machines.
- Maintained existing machines.
- Provided technical support.
- Administered AIX, Windows NT/2000, Win9X, and Novell servers.
- Developed simple web applications using HTML forms and Perl.

EDUCATION

- Front Range Community College – Business Information Systems
- Dale Carnegie Training – Leadership and Presentation Training
- Miller Heiman – Strategic Selling
- Skillpath – Project Management Training
- Various vendors – C#, SharePoint, XML, SQL
